

ALVEE HOSSAIN

Software Engineer

+8801957320294 | md.hosen.pro@gmail.com | [Portfolio](#) | [GitHub](#) | [LeetCode](#) | Dhaka, Bangladesh

OBJECTIVE

Computer Science and Engineering student with hands-on experience in React, JavaScript, Python, and modern web development. Experienced in developing responsive web applications, creating reusable React components, designing user-focused interfaces, and organizing application data for practical use cases. Interested in software engineering and problem solving, with a strong focus on building clean, maintainable applications and continuously improving programming and development skills.

TECHNICAL SKILLS

- **Languages:** HTML, CSS, JavaScript, Python, C, C++
- **Backend:** Python
- **Frontend:** React, Tailwind CSS
- **Database:** MySQL, MongoDB
- **Tools:** Git, GitHub, VS Code
- **Core Concepts:** OOP, DSA

RESEARCH

- **Zero-Day Attack Detection:** Researching approaches for detecting previously unknown cyber attacks, focusing on unusual behavior identification, attack-pattern analysis, and improving early detection of emerging security threats.

PROJECTS

Student Management System

[Demo](#)

- React

A multi-portal student management system built with React to organize academic and administrative activities through separate role-based interfaces.

- Student Portal: Provides students with access to academic information and student-focused functions.
- Teacher Portal: Supports teacher-focused academic tasks and student-related information management.
- Admin Portal: Provides administrative control over users and the overall management system.
- Accountant Portal: Handles account and financial-related management within the institution.
- Librarian Portal: Supports library-related management and student/library activities.
- Built reusable React components and responsive layouts for different user roles.

E-Commerce Platform

[Demo](#)

- React

A modern e-commerce web application built with React, designed around product browsing and a clean, responsive online shopping experience.

- Developed product-focused pages for browsing and exploring available items.
- Designed responsive layouts that adapt to desktop and mobile screen sizes.
- Used reusable React components to keep the application structured and maintainable.
- Focused on clear navigation and user-friendly presentation of products and shopping workflows.

Offline Study

[Demo](#)

- React

A React-based learning platform being developed to help students access study resources and continue learning when an internet connection is unavailable.

- Designed around saving and accessing study resources for offline learning.
- Focused on a simple and student-friendly interface for educational content.
- Developed with React using reusable components and responsive layouts.
- Work in Progress: Offline learning features and functionality are currently under development.

UU Study Hub

[Demo](#)

- React

A React-based student study management platform designed around university student IDs and semester-based academic progress.

- Students can log in using their university student ID and access personalized study information.
- Shows what students need to study each day and helps them understand remaining coursework.
- Provides a semester-focused view for tracking remaining academic workload and progress.
- Designed to support daily academic planning through a simple student-friendly interface.

EDUCATION

B.Sc. in Computer Science and Engineering

Expected 2027

Uttara University

Higher Secondary Certificate (HSC)

GPA: 4.88 / 5.00

Secondary School Certificate (SSC)

GPA: 4.78 / 5.00

LANGUAGES

- **Bangla:** Native | **English:** Professional Working Proficiency
